What were you doing (clicking link, inputting text, registering/logging in)...

Just chatting with the users

I was looking for a way to send a message to someone other than the initial 2 people available to contact. In a separate window in the "Progress" tab, I realized I couldn't scroll all the way down to the bottom of the page to see the objective for Ann Gunn (this is when the page is split-screen, so the page jumps into a 'mobile' view and covers the bottom part of the page with a navigation button. I thought this was an issue, so I refreshed the page. After refreshing, I noticed that a bunch more stuff had appeared in the "message" tab that wasn't previously there.

attempting to make account without google authentication (I easily got in)

trying to input text

Explain the bug (what happened). 5 ⓘ

Explain the bug (what happened).

chat history disappears randomly and only comes back after the page is refreshed.

2 bugs:
1. The split-screen (mobile) view of the page obscure the bottommost objective in the progress tab.
2. Updates to the "message" tab and "progress tab" (such as unlocking access to talk to other people) don't appear to the end-user unless you refresh the page.

Your authenticator doesn't make sure non-google/not logged in can't enter.

The color of the text is white, and it makes it very hard to see the text on dark mode.

It's not really a bug. It's a grammatical error. Under "Harvesta Foods," the sentence "Through other sources, it has been confirmed that the announcement is about a new location that Harvesta Foods will be building a grocery store in" should not end in a preposition. I would recommend rewording to "...a new location for an upcoming Harvesta Foods" or something like that.

the new users didn't appear until after a forced page refresh either.
