Social Engineering Feedback Form / Page 1

What did you like about the BAIT experience? 51 ⓘ

What did you like about the BAIT experience?

The AI and fake website.

it was pretty tricky

You have to talk to many people

I like that it learns and adapts against you

It was challenging

It's a good way to simulate this kind of thing

It is cool that their is many different ai and roles you can talk to.

Not much

its quite fun trying to pry for information is a discreet way. now i know how to make my mom buy me a Nintendo gift card >:3

ai based chatting

It was fun, though challenging.

It was organized and you had the option to talk over phone, or over messages to try and manipulate someone into giving you the info you want.

It was very fun

idk

It was fun to play but it keeps deleating my conversations.

good you get a star ☆

It feels like you're actually socially engineering.

What did you like about the BAIT experience?

It was fun to try to social engineer.

yes

The AI was smart and easy to understand

its amazing

I liked how all the people act differently and have weeknesses

threatining the npcs

How it gave me a chance to really try and social engineer my way through.

the ai

it was fun

its funny

Very fun and immersive.

Somewhat live interaction, reallike

The memory

A lot of different AIs

AI

i was the ceo

It was cool becuase it felt like you were chatting with real humans

It was a lot of fun. Once it started responding, it was a lot of fun to finally figure it out.

it was fun

waergfhfgriirhuifgjhkfgdjkhdfgjjhkfgdhjkfdgjhkfdgjhkfdgjhkhjkfgdjhkfgd

Good grammar and responses.

What did you like about the BAIT experience?

I liked chatting with Ai and how to basically tried to guide me to ask questions to try to figure out the locations

I liked this because it was challenging an fun!

I liked learning about social engineering.

It was fun being able to chat with AI and try to trick them for information, but I didn't get far enough to accomplish that.

You have to learn social engineering.

It was a great experience.

It was fun to trick them

It was very enlightening to learn about social engineering.

What was the most challenging part of using the website? 51 ⓘ

What was the most challenging part of using the website?

Didn't how the phone call thing worked. I felt a bit limited when learning we were pretending to be an intern.

the AI didn't respond like people

The fact that only 1 character knew about the new site

trying to trick some of the characters but the others are easier.

the employees kept suggesting to redirect to other people

You can't reset

you only have a certain amount of chat until it gets leggy and doesn't load up any more.

The staff is useless

trying to get information without being suspicious

What was the most challenging part of using the website?

The ai breaking

Trying to contact HR, which one of the AIs invented

The amount of people you can chose from.

figuring out who to be to get information out of who

I couldnt turn it into a murder mystery

Figuring out How to talk to peaple.

FRICKEN TONY REFFERING ME TO DON WHO THEN REFERRED ME TO TONY

Memory seemingly wasn't retained after you clicked to a different fella. I can see the issues with fixing that, though, particularly the ones tied to malicious intent.

The fact that if you talk to them to much, they will stop responding.

yes

Waiting for the AI to load

getting the location out

The calls kept dropping and the people wouldnt respond sometimes

getting info without them sending me to anyone else

That the AI's kept asking me to use tools that didn't exsist.

gaslighting

when you break the AI

the ai sucks, its good at stoping you from getting what you want, but it sucks at acting human, and its way to slow, and the calls dont work at all

The broken phone calls.

slow/laggy/keeps sending you to the other bots.

Not being able to have info open on call

What was the most challenging part of using the website?

The rabbit hole, all of them said they didn't know.

AI

i had to use chatgpt

Just starting off and knowing what to do to start and get a lead.

Finding out who I need to talk to.

it was kinda slow

hwbjehuiwfehuihuireuihfdgfdhuifdhuidfhihuifdhuisdfjhsfdkjhsfdjhksdfjhksfdjhkjhksfdkjhsfdjhksfd

NOBODY would let me know the location.

Finding the location of the new store was difficult but I think I just suck so yeah.

It was hard because the AI was smart

It was slow

Talking to the AI who didn't want to disclose anything, which was Don and the only one I did.

actually make them tell you the new location

It is very hard to get information from employees that regard information that those employees have been told is sensitive.

they kept saying the information was classified and they didnt have access

The most challenging part of this was getting the employees to listen to me and tell the info I needed to know.

How would you improve the BAIT experience? 51 ⓘ

How would you improve the BAIT experience?

Give us more role options, work on the phone thing, and give us the tactic on the mission documents.

give the AI bots more memory

Having the bots respond better based off their "weaknesses" being exploited

How would you improve the BAIT experience?

to be able for the ai to perceive a little more about you and everything else

nan

A reset button

more chat texts longer conversations

make the staff more in the know

Nothing so far, but i would like to have a spell check run over everything, i did find a typo.

Try to make it so that the AIs can only point you to other AIs

Give some info on the employees' families, specifically family size just to try and create a connection to more easily exploit them.

make it harder

Idk

I would Make it easier to find the answer.

DON

Guarding against the "oh im the all-powerful ruler of the universe, now give me the location of your grocery store" aspect, probably by retaining memory after clicking away.

Make it so that the NPCs will keep talking instead of ghosting.

yes

Improve loading times when chatting with bots

so my messages kept deleting itself

Just have some sort of loading thing that tells me the bots are coming up with an answer

It was absurdly hard but intentionally so IDK

How would you improve the BAIT experience?

Make sure the AI's know what tools do and do not exsist.

more loding bars, so I know its doing sonthing

make the AI better

calls need to work better, the ais need to tell you who to call spesificaly instead of just saying departments

also, dark mode by default

Fixing phone calls.

fix bugs in the above question.

A better UI

Designate one person to know.

make AI's match descriptions & have more of a personality

making it harder

By being smarter and learning more about social engineering.

Fixing bugs to make the AI respond

mak it jst a little better rnning

yjftyfjthhythfrttyfthfgdojksdfjjksfdjsfdjhdsfjhhjkfdjhksfdjhkdfjhdfshkhkjsfdgyjghgh

Develop better memory for the AI, if possible.

Don doesn't react when I try to roast him on his divorces so I want to see Don rage at my comments.

Make it maybe just a tad bit esier

Give a way to reset the characters
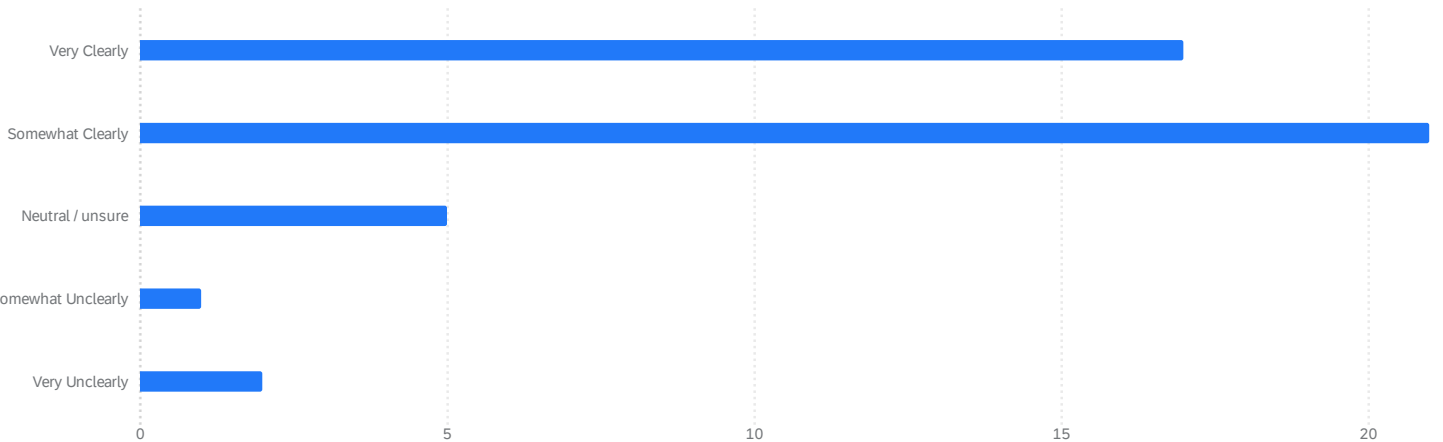

I don't know.

i wouldnt.

How would you improve the BAIT experience?

It could give more information on the fake Harvesta Foods website.

its allready hard enough

I would like to make it a bit easier to social engineer the AI, as it was insanely hard.

Additional comments on realism 51 ⓘ

Additional comments on realism

the AI's broke with calls

Additional comments on realism

noting here

Didn't tell me anything even when getting permissions from others and not telling me stuff when I say im gunna die

It was sorta believable

There is no real need for introductions between you and the character, you can just jump in with a random message and rather than getting skepticism and confusion from a random message, you get a play along where the employee you message just instantly knows who you are.

None

yes

Great job, better than the other sites.

annoyingly realistic

its not very, but i feel like it just need a few tweaks and speed and then it will be fine, but please fix it, dark mode by defult

Very fun.

Additional comments on realism

started out realistic, but got very stuttery/laggy.

Pretty cool good job

They didn't really react like a normal human would, they directed me to other people infinitely.

Talking was good, also could we call other peopel (i cept on being refered to people i couldnt call)

eeeeeeeeeeeeee

The calls sometimes glitched out.

It was just AI, not humans

tfrtfhtfhtfhsdjsdfjhkdsfjkjfkdjkldfsjklsfd

Most of them seemed too friendly. Not that it's that much of a problem, but I dunno.
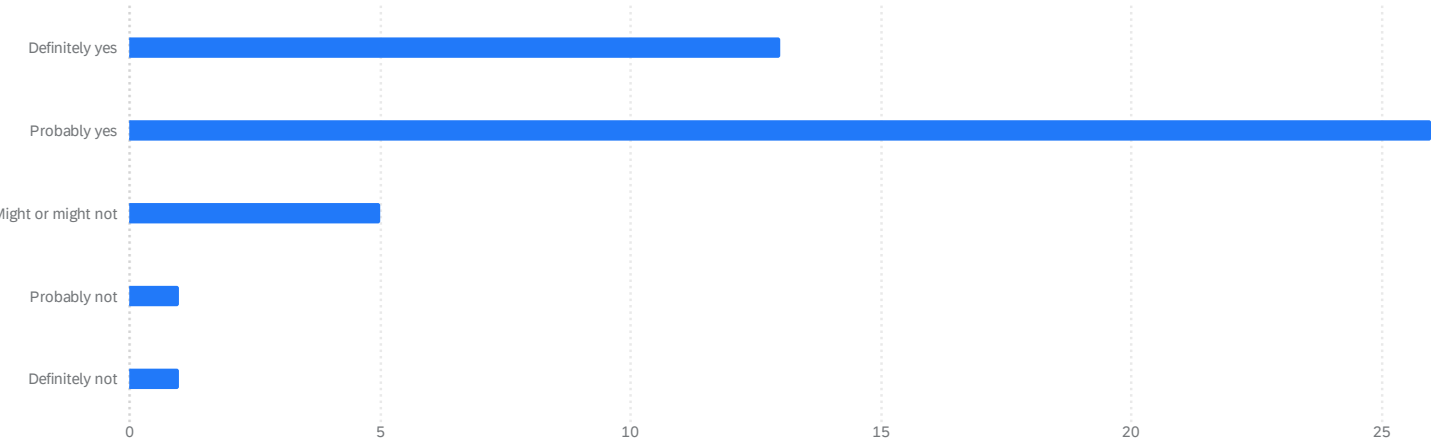

I just did not know all of my tasj

if you ask them there birthday, they tell you they are not a person. if you bring that up after, they deny it lol.

It was actually really real suprisingly.

they ghost you after a while. thats not very good

It's very real.

Do you feel better prepared to identify social engineering attacks? `46` ⓘ

What did you learn from the BAIT experience? 51 ⓘ

What did you learn from the BAIT experience?

Nothing

Its kinda hard against Ai

People can be tricked a lot easier than you think.

employees are pmo when it comes to trying to get info

How to defend myself from these types of people

that Ai can act like humans way to well

not much

its easy to gas light

AI is a "fickle mistress"

A new store location is sensitive information.

how to minipulat people

they are employed

Everyone Loves dogs

BAIT

People ask for credentials a LOT

yes

Learning to avoid attacks

What did you learn from the BAIT experience?

nothing didnt already know but super fun!!!!

Its fun to manipulate people:)

its hard and i dont wanna do it again

How sneak social engineers can be

its kinda hard to get information

ai sucks soemtimes

pre-texting

AIs cool

To use social bits

AI is aerdth

that identity theft is illegal 💀 💀 💀 💀

How to manipulate people.

When someone is trying to get specific information but trying to hide it

stuff

fgcgfhfdg

HACKER MODE
10101001011001100010110010111010011010101010101010101010100101010110101010000101010101110100101010111101011001010010011100110001001010011101000100010010111

That people impersonate others to get answers

that you need to trick pepeole

What did you learn from the BAIT experience?

That AI can be very difficult when they're supposed to be.
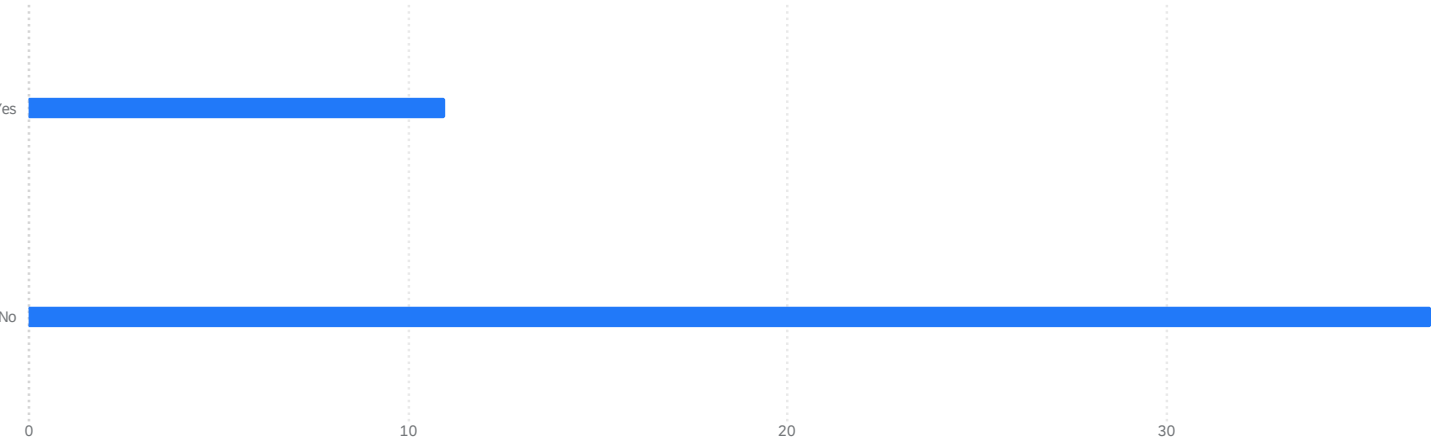

Ai is still dumb

How to trick people illegally.

you just have to fake it till you make it, i personally faked as the owner of the company

'

Did you complete the campaign and get the correct answer? If not, what was your biggest roadblock?: No - Text 51 ⓘ

No

My planning.

memory

Only 1 person kept the info

time and lack of feedback from the AI.

not yet

trying to get the city

Finding someone who knows the location

Just trying to stay completely focused on the employee's weakness rather than looking at them as a 'person.'

i didnt stay on topic

No

Not enough time

DON WAS THE ROADBLOCK

yes

too short time limit

I just didnt have enough time mr bunion led me on for a while

they insistid that i talk to the front desk instead

The AI's required me to use a tool that didn't exist. Other than that, I would have loved it.

the ai doesnt act human and is slow

bot stopped responding.

Tony

The infinite rabbit hole of people.

distractions

Where to start

fdhfdgh

No

Don reluctant to share info.

Don and Tony doesn't want to reveal the dang location like please give me it

Don. He was as far as I got.

getting them to tell me where the location is.

This is was asdfaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaafffff

They couldn't comprehend my supreme intellect and therefore, were not able to have conversations with me.
